## **Do...**

✓ ICO Be very(!) careful using AI for coursework. If you must use it, you must reference it. The rules state:

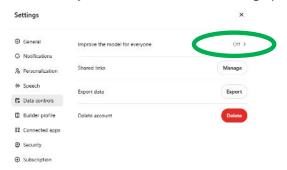

In many subjects, candidates will use source material, including the internet and AI, when carrying out their coursework. However, candidates **must not** copy such material and claim it as their own work.

If candidates use material from a source or generated from a source which is not their own work, they **must** indicate the particular part/element/phrase and state where it came from. Candidates **must** give detailed references even when they paraphrase the original material.

Where computer-generated content has been used (such as an AI Chatbot), the reference **must** show the name of the AI bot used and should show the date the content was generated. For example: ChatGPT 3.5 (https://openai.com/blog/chatgpt/). 25/01/2025. Candidates should retain a copy of the computed-generated content for reference and authentication purposes.

Get it wrong and the consequences could be dire ②. Please take time to read the Appropriate Use of AI Policy linked here.

✓ ⑤ If using ChatGPT, double-check your 'data controls' in Settings (shown here)

✓ 

§ If using ChatGPT, try 'Temporary Chat' because...

## **Temporary Chat**

This chat won't appear in history, use or update ChatGPT's memory, or be used to train our models. For safety purposes, we may keep a copy of this chat for up to 30 days.

- ✓ Suse AI as a study partner. For example, ask it to give you multiple choice questions on a certain topic you're revising, or to provide an alternative perspective on an idea, or to debate with you.
- ✓ Apply the E.V.E.R.Y model ...every time. Remember, Al can make mistakes!

## Don't...

- upload <u>any</u> information that could identify another person name, date of birth, contact details, etc.
- upload any documents if the author denies permission (often stated on the front cover)
- ✗ use Grok Free or DeepSeek (until we are more confident re their data security!)
